

# Vetramil<sup>®</sup> PAW WAX

THE NATURAL POWER OF HONEY

## Product Information

### Product

Vetramil<sup>®</sup> Paw Wax, Paw Wax with honey, Net Weight: 1.59 oz. (45 g) / 4.23 oz. (120 g)

### Ingredients

Water, Honey, Cetearyl Alcohol, Caprylic/ Capric Triglyceride, Butyrospermum Parkii Butter, Glyceryl Stearate, Cera Alba, Alcohol Denatured, Cetearyl Glucoside, Prunus Amygdalus Dulcis Oil, Bisabolol, Cetyl Palmitate, Citric Acid, Cocoglycerides, Denatonium Benzoate, Eucalyptus Globulus Leaf Oil, Glycerin, Helianthus Annuus Seed Oil, Lavandula Angustifolia Herb Oil, Limonene, Linalool, Menthol, Tocopherol, Potassium Sorbate, Sodium Anisate, Sodium Benzoate, Sodium Levulinate.

### Recommended Use

Outdoors, to protect the paw pads against extreme conditions; indoors, to prevent skidding, since the wax makes the pads less slippery.

### Product Description

Vetramil<sup>®</sup> Paw Wax with honey has been specially developed for the protection of dogs' pads. In both summer and winter, the pads are in direct contact with extreme conditions such as hot asphalt, ice, salt, snow, and rough surfaces. This can lead to a rough skin and can cause irritated pads because of chapping. The high concentration of enzyme-rich honey in Vetramil<sup>®</sup> Paw Wax is soothing for the pads. Beeswax forms a protective layer, which keeps the pads healthy under all conditions. The bitter taste prevents the dog from licking off the wax.

### Directions for Use

Massage a layer of wax into all paw pads (one to three times a day).

### Additional Information

All Vetramil<sup>®</sup> products contain high concentrations of enzyme-rich honey. The natural antioxidants in honey soothe the skin and pads. Beeswax forms a water-repellent layer that provides protection against weather conditions and other extreme environmental factors. The essential oils in Vetramil<sup>®</sup> Paw Wax promote a good skin condition and help protect the pads. The wax's bitter taste is due to the addition of a very low and perfectly safe concentration of denatonium benzoate. This prevents the dog from licking the wax off. Vetramil<sup>®</sup> Paw Wax contains only natural preservatives and is paraben-free.

### For which animals is it suitable?

Vetramil<sup>®</sup> Paw Wax has been specially developed for the protection of dogs' paw pads.

### Storage

Store between 39 °F / 4°C and 86 °F / 30 °C.
